A tutorial for editing images with Photoshop CS4 can be found in the appendix at the end of the book. In the following sections, I show you how to create new layers, flip layers, add text, and modify and enhance any image. This chapter details some of the more essential layer commands. See Chapter 4 for a step-by-step tutorial on creating and using layers. ## Erasing You can erase anything you want in Photoshop, with a few restrictions. In most programs, you can erase a path — a path is a line that draws something, a shape, or a freeform object. You can add or remove the path. The free-form options are limited, and you can't create multipatch paths, split paths, or make a polygon. To remove objects such as images, you need to use a lasso tool and then select the Eraser tool (it looks like a hand with an eraser) to remove the areas you select. You can remove portions of images by using the Eraser tool, but the most powerful tool for image editing is the Clone Stamp tool. I talk about both in the next section.

What's New in the Adobe Photoshop CC 2015 Version 17?

The European Union continues to refuse to lift the embargo on Cuba, claiming the only solution to the political crisis in that country is to stop being part of the region, in other words, leave. Hungary's Foreign Minister Peter Szijjarto offered an alternate view to the EU on Wednesday, stressing that in his opinion this is the wrong way to resolve the crisis, given that the country's territorial integrity has been violated and its national sovereignty has been infringed upon by the Castro regime. Speaking to DW and the Spanish newspaper El Mundo, Szijjarto highlighted the fact that Cuba has invaded Hungary, stating that it's essential for Budapest to respond by launching an invasion of Havana, much like the Yugoslav army did during the Spanish Civil War (1936-1939). "Cuba has invaded Hungary, and we don't need to wait for a second invasion or for the Vietnamese to steal their oil", he said. According to Szijjarto, such a move would be beneficial to the independence of Cuba because it would force the Castro government to think carefully about its international positioning. "We could do it right now, but we'd have to

invade Cuba and establish a paramilitary force for that. Then we'd negotiate the future of Cuba with Cuban officials, and the Cubans would probably come to an agreement with us. In the short term, we could occupy Havana, take control of the country's oil, run elections and make sure it doesn't happen again." Szijjarto's proposal has however been met with scepticism and derision by some other EU foreign ministers, such as Luxembourg's Jean Asselborn, who has expressed his strong support for keeping the embargo on Cuba in place. "It is the view of the European Union that Cuba's embargo on European products must remain in place because the circumstances have not changed and it remains an open question whether the current Cuban leadership will continue to keep its promises," said Asselborn. He also went on to claim that the embargo could be lifted once Fidel Castro dies and the country's new leader "takes steps to guarantee the political and economic freedoms of Cubans." This is because, according to him, those critical freedoms are being restricted within Cuba and it's therefore necessary to keep the embargo
