For troubleshooting, check if you have enough free space on the hard drive. If not, delete unnecessary files from the main part of the disk and the recovery partition. This free utility is made for use in recovering data from partitions that are damaged or infected by viruses and trojans. It can repair and recover the original partition, which is usually not infected, and restore your data. Programs like this are not able to repair the drive completely, but they can save you from losing hours of work. However, the User Manual contains a lot of detailed instructions that should prove sufficient for the novice. A free version of the program exists.
