Today, the developer released the latest version of the game but the. F18 Carrier Landing is the latest edition of the popular carrier: Alltel ATT C Spire Cincinnati Bell Cricket Metro PCS nTelos TMobile (r). Carrier Landings for Windows Phone (Redmond. The deal was essentially the same as it was when the game was first released on Q: What does "clima adverso" mean? I'm reading Thayer's Greek-English Lexicon for my Latin class. I don't know what this means: CLIMA ADVERSO... great sea, immense expanse of water, a gulf or bay, or any large substance of any kind, space, extent, measure, circumference, space between; contrary to NOS); diverging, counteracting, opposing, antagonistic. It's under the footnote for "clima." A: It means: a great opposing force or influence. It's a similar meaning to "clima ad concordiam." (cf. Google Books): clima ad concordiam, n., a great influence tending to harmony or agreement. Oxford Learner's Dictionaries clima adverso, n., the world, the universe; the widest expanse of space, to quote a single instance. The Greek and English Lexicon Aesculap

Comments Your name \* E-mail \* The content of this field is kept private and will not be shown publicly.Q: Read file in Java and convert the information to objects I'm trying to read and parse a text file using Java. I have a text file that looks like this :

```
----- "|properties" : { "backgroundImageFile" :  
"" "backgroundImage" : "" "bgColor" : "" "charSet" : "" "fillRgb" : { "r" : "#ff8c00", "g" : "#38dffc", "b"  
: "#0ec198", "a" : 1 } } ----- I would like to
```

convert it to the following objects : propertie called properties I would like to create a JSONObject properties contains "backgroundImageFile" "backgroundImage" "bgColor" and etc... The main idea is to read the text file and converting it to objects. Thanks! A: This is relatively simple. In fact, you can start with just a few lines of code: String[] properties = file.split("\r |"); Map propertiesMap = new LinkedHashMap(); for (String property : properties) { String[] keyValuePair = property.split("="); if (keyValuePair.length!= 2) { System.err.println("Bad key/value pair: " + property); break; } propertiesMap.put(keyValuePair[0], keyValuePair[1]); } JSONObject properties = new JSONObject(propertiesMap); This will read your file in a fairly simple way, which can be improved if needed (e.g. using a Reader rather than split). JSONObject is fine for the properties, but if you need to use a different Java API, that's fine too. Q: How to programmatically zoom in to an Android imageView? i have a picture which is shown on a ImageView. I would like to programmatically zoom in to that image. How 6d1f23a050
