Math-o-mir is a software tool that can be used in order to aid people in easily writing mathematical content, editing equations and saving all your work to the hard drive. Clear-cut GUI The installation process does not last very long and does not pose any issues, while the interface you come across can only be described as straightforward. It is comprised of a menu bar, a few buttons, a toolbar and a pane in which to view and edit your on-going projects. Extensive and well-drawn Help contents are provided thus ensuring that all types of users can easily learn how to handle this tool. Save projects and settings First and foremost, you should know this utility enables you to save your work in a proprietary MOM format, and comes packed with some example files, so that you can easily figure out what it can do. It is also possible to set it up to automatically save your work at a predefined time interval or print projects, with just a click of the button. Settings can also be saved to a SET file, so that you can use them at a later date. Insert symbols, use a virtual keyboard and create hotkeys A toolbar enables you to add a large number of symbols and mathematical operations, while you can also easily increase and decrease elements, use a pencil in order to free-hand draw, and enable a grid. A presentation mode can be implemented with ease, you can use an eraser, as well as copy, cut, paste and delete selected items. A virtual keyboard is put at your disposal, mouse-wheel functions can be changed, keyboard shortcuts can be created for each and every operation and it is possible to undo your actions with ease. Conclusion and performance The system's performance is not going to be hampered at all, as the CPU and memory usage is low at all times. Jobs are completed in a timely manner, the interface is accessible to all user categories and there are sufficient options to keep you busy for quite a while. All things considered, it is safe to say that Math-o-mir is an efficient piece of software when it comes to writing mathematical texts, which did not pop any errors, freeze or crash in our tests.
